

Our 2011 Buyer's Guide

Welcome to the *Cardiac Interventions Today* 2011 Buyer's Guide, our comprehensive guide to the interventional cardiology devices available in the United States.

As *Cardiac Interventions Today* enters into its fifth year of publication, we continue to strive to meet our goal to provide timely and comprehensive information to our readership. Since our first issue, we have offered you a publication that synthesizes the ever-changing interventional cardiology field into a single place where you can be assured that the coverage is complete.

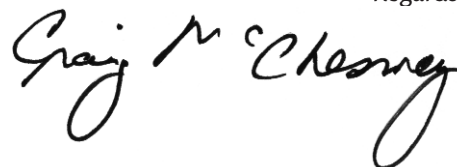

Our goal is similar with our Buyer's Guide: to offer you one complete source for the coronary and cardiac devices available in the United States with Food and Drug Administration approval. These listings provide manufacturer information, device names, sizes and dimensions, unique specifications, and indications for the many interventional cardiology products on the market today.

As well as in print, the 2011 Buyer's Guide is available in its entirety on our Web site at www.cardiacinterventionstoday.com with no fee. In addition, in early 2011, we will be launching an iPad app to make this information even more accessible to you.

We also extend a warm thank you to our industry associates for their efforts in sharing and reviewing the detailed specifications of their many products. We could not create this Buyer's Guide without their assistance.

The *Cardiac Interventions Today* staff wishes our Editorial Advisory Board, authors, clients, and readers a happy and healthy New Year. We welcome your comments and feedback so that we may continue to build on the success of the Buyer's Guide in the years ahead. ■

Regards,

A handwritten signature in black ink that reads "Craig McChesney".
