KEY FEATURES	
<ul style="list-style-type: none"> • Ultra-low lesion entry profile (0.017-inch) and excellent crossing profile • Rapid deflation times and balloon lengths up to 220 mm • Shaft design optimized for maximum pushability and trackability • Over-the-wire and Monorail platforms on 90- and 150-cm shaft lengths 	

Boston Scientific Corporation (Natick, MA) announced the global launch of its Coyote balloon catheter, a highly deliverable and ultra-low-profile 0.014-inch balloon dilatation catheter, which is designed for peripheral angioplasty procedures below the knee. The

company plans to launch the product immediately in the United States, Europe, and other international markets.

Boston Scientific developed the Coyote balloon catheter to address physician requirements for treating challenging obstructive lesions in the lower extremities. It offers an ultra-low lesion entry profile (0.017-inch), excellent crossing profile, and a catheter shaft optimized for pushability and trackability, the company stated. The balloon offers rapid deflation times and lengths up to 220 mm on both over-the-wire and Monorail platforms. ■
