

Adelante Magnum Hemostatic Valve Introducer

Oscor Inc.
(727) 937-2511
www.oscor.com

KEY FEATURES

- Multilayer, hydrophilic-coated sheath
- Specially-designed distal tip portion
- SureSeal technology
- Available in multiple French sizes and sheath lengths

Oscor Inc. has received FDA 510(k) clearance for the Adelante Magnum hemostatic valve introducer for large-size vascular access. The device is specifically designed and optimized for the introduction and placement of endo-

vascular catheters, aortic valves, and stent graft systems. The proprietary multilayer, hydrophilic-coated sheath has a specially designed distal tip portion to accept and tolerate the insertion and manipulation of large and complex devices. Adelante Magnum's SureSeal technology facilitates hemostasis, allowing the insertion of multiple catheters and wires simultaneously with minimal blood loss. ■
