40 ★★★★★

The percentage of older patients who use online reviews when choosing a physician¹

1. Kullgren JT, Malani P, Kirch M. Use of online physician ratings and reviews by older US adults: results of a national survey [published online April 13, 2021]. *Ann Intern Med*. doi:10.7326/M20-7600.

CALL TO ACTION

"Experts are now predicting a 'pandemic of pandemic-related disease.' Some argue that a large backlog of visits postponed due to the pandemic has left some patients untreated or undertreated. In our experience, delays in care can lead to irreversible vision loss. It is the responsibility of physicians to call patients who have been rescheduled or self-cancelled. Devastating loss of vision and blindness ultimately have a snowball effect on the entire medical community." | —Karine Shebaelo, MD, MSc, and Malka Davina Kirschenbaum, MD; "COVID-19: An Opportunity to Forge a New Road Forward," *MillennialEYE*, March/April 2021
