

SPOTLIGHT ON IGC GLOBAL

Updates from the inaugural program in Dublin.

In May, the Interventional Glaucoma Consortium (IGC) expanded globally to host the first-ever IGC Global program in Dublin. This think tank brought together an international group of leading glaucoma specialists to exchange innovative ideas and education that promote a proactive, not reactive, approach to patient care. Led by Program Chairs Iqbal Ike K. Ahmed, MD, FRCSC; Henny Beckers, MD, PhD, FEBOphth; and Arsham Sheybani, MD, the program covered a range of progressive topics (see *Hot Topics at IGC Global*) designed to foster discussion among colleagues and ultimately push the space forward.
