

VRTIS Corcostegui Pick Forceps

COMPANY	Asico LLC
PHONE	+ 1 630 986 8032
WEB	www.asico.com
KEY FEATURES • Combined pick, spatula, and forceps • Available in 23-, 25-, and 27-gauge • Ergonomic handle	

The VRTIS Corcostegui Pick Forceps (Asico LLC, Westmont, IL) is a combined pick, spatula, and forceps designed for grasping, dissecting, and peeling the internal limiting membrane (ILM). The jaw design provides surgeons with visibility from all angles, even when the jaws are closed, and the ergonomic handle gives the user tactile feedback.

FarView, ClearView+ G2, and ClearNote Portable

COMPANY	Optelec US Inc.
PHONE	+1 800 335 7970
WEB	www.optelec.com
KEY FEATURES • Magnification and illumination functionality • Ergonomic and modular designs • Easy to transport and portable	

Optelec US Inc., (Vista, CA), manufactures three electronic solutions for patients living with low vision. The FarView is a portable magnification solution that allows users to store, review, and share information in a compact design. With the benefits of distance and close-up viewing, the built-in auto focus camera (storage capacity of up to 100 images), zoom-in functionality, scrolling, and auto-return bring the environment within the user's scope of vision for best visual acuity. The ClearView+ G2 is a desktop electronic video magnifier with high-definition image quality and a five directional ultra-flexible thin-film—transistor arm that can rotate 90° for easy newspaper column reading. With this product, the user can read and write with magnified and illuminated viewing assistance. The ClearNote Portable is a laptop or desktop computer magnification solution connected through its USB port. When connected to a personal computer, the ClearNote Portable completes a portable workstation with real-time video magnification and takes little desk space. This product has an ultra-flexible camera head and is foldable and lightweight, making it convenient to transport. ■
