

MacuTrition

COMPANY	Advanced Vision Research, Inc.
PHONE	+1 800 579 8327
WEB	www.theratears.com
KEY FEATURES • Available over the counter • Protects against diabetic eye disease and age-related macular degeneration • Suppresses oxidation, inflammation, and neovascularization	

MacuTrition, (Advanced Vision Research, Inc., Woburn, MA) is an over-the-counter oral retinal nutritional supplement that, according to the company, has the potential to protect against diabetic eye disease and age-related macular degeneration by suppressing oxidation, inflammation, and neovascularization—the three mechanisms that drive these diseases. MacuTrition contains antioxidants and carotenoids, as well as fish-oil omega-3s, vitamin D, green tea extract, and tocotrienols (vitamin E) that support both vision and health.

Grieshaber DSP Asymmetrical Forceps

COMPANY	Alcon Laboratories, Inc.
PHONE	+1 800 862 5266
WEB	www.alconretina.com
KEY FEATURES • Single use • Tip may be used as a pik • Available in 20-, 23-, and 25-gauge	

The single-use Grieshaber DSP Asymmetrical Forceps (Alcon Laboratories, Inc., Fort Worth, TX) are designed for fine membrane peeling. The angle of the tip conforms to the retina for better visualization while grasping tissue. The tip may also be used as a pik. The forceps come in the Grieshaber Revolution DSP style and the Grieshaber DSP Tip style, both of which can be paired with your preferred reusable handle. ■
